

## Fall 2006 Update

- The new pages for 2006 are now complete and have been posted on ophea.net in the Safety Services Package area. They are posted both as single downloads and have also been inserted into the documents that are online. There are 19 new pages in all. Of particular interest may be the new primary movement page to assist generalist teachers at the primary level with risk management practices.
- Requests for new/revised pages are welcome. The final date for submission is October 31, 2006. The form to submit is posted in the SSP area.
- We are continuing to work at updating the entire safety guidelines documents. This is a huge task! We work to getting this new version out to boards this fall. (Next meeting Oct 25/26)
- Boards who chose to pay the three year subscription in installments can expect an invoice for year two within the next two weeks.
- We now have 52/60 school boards subscribing to the Safety Services Package! The subscription allows those boards to have access to: yearly updates, online access to the documents, FAQs, consultations, discounted workshop fees and the continuing work on updating the whole document.
- Finally, if your board contact for safety has changed, please let us know so that we can ensure that information is getting to the correct person(s) throughout the year.
